This is Eltel

- Eltel Lithuania is a part of Eltel Group Corporation which is a leading Nordic field service provider for communication and power networks
- Eltel builds, maintains and upgrades essential lifelines for national network operators and owners enabling a more sustainable and connected world today and for future generations
- Since 1991 our company has gained high level of competence and experience – from maintenance and upgrade services to project delivery

Eltel Lithuania

> 250 highly qualified and experienced employees

> 31 years of experience providing services locally and abroad:
Lithuania / Norway / Sweden / Finland / Denmark / Germany / United Kingdom

Our scope of works includes installation, reconstruction, maintenance and building of Mobile and Fixed networks

We are proud professionals who know our services make society more robust with well-managed and modern communication and power networks

Eltel offers

Renewables

- Solar installations
- EV charging stations
- Preventive and corrective maintenance

Fiber solutions

- Provision of construction services for optical fiber & copper cabling systems
- Optical fiber and copper networks maintenance

Mobile Roll-Out & Build

- Design and construction of towers, masts and cellular network base stations
- 2G, 3G, 4G and 5G installation and commissioning
- Preventive and corrective maintenance of cellular networks

Renewables

Solar installations

- Planning, calculation and design
- Installation and commissioning
- Connection to power distribution grid
- Preventive and corrective maintenance

EV charging stations

- Technical site survey and design
- Full installation and commissioning of electric vehicle charging stations
- Preventive and corrective maintenance
- After build restoration and landscape recovery works

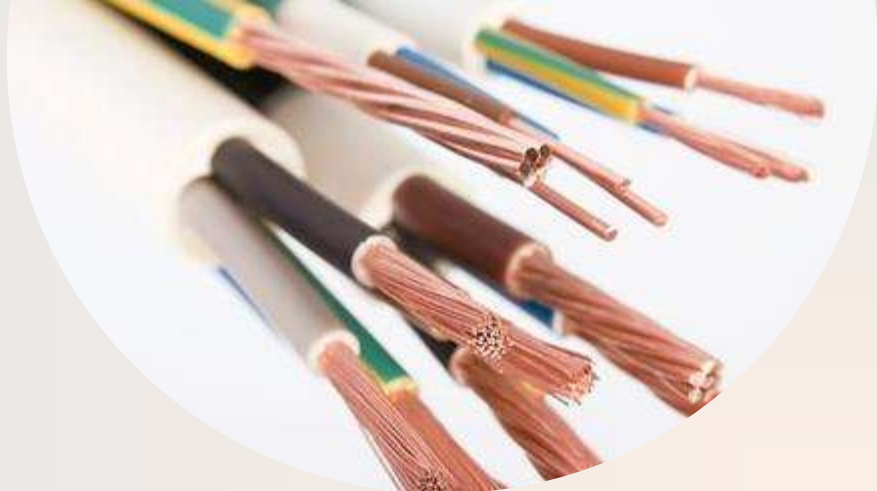

Fiber solutions

Fiber networks services

- Construction of aerial and ground cabling systems
- Installation of required mounting equipment
- Set-up and splicing of splicing box and internal components
- Testing of optical fiber infrastructure components (using the OTDR tools for bidirectional measurements)
- Traffic fault locating and rectification, existing aerial network parts fault elimination
- Maintenance

Copper network services

- Ethernet network wiring and installation works
- Equipment installation services (DSL, DSLAM)
- Fault liquidation
- Maintenance

Other Fiber networks services

- Splicing and jointing hybrid cables
- Complete sea cables integration to the network including cable anchoring
- Network's capacity expansion with GPON technology (1/4 - 1/64)
- Installation of all type aerial cable, cable risers, coil frames, cable brackets (wooden pole climbing)
- Installation of power supply
- Blowing of all type micro, nano cables
- FTTH, FTTB Indoor and outdoor installation
- Assembly of all type cabinets, racks and panels
- Optical fiber and copper structural cabling

Mobile Roll-Out & Build

Mobile network services

- Technical site surveys
- Planning and design of base stations, steel structures
- Radio link planning and budget calculation (Cellular Expert)
- Installation and commissioning of new radio links
- Installation of new base mobile stations and upgrade of existing
- Tower and mast design, installation
- Commissioning and integration of 2G, 3G, 4G and 5G equipment into Cellular Network
- Testing and coverage verification
- OMC/ICC/NOC activities, network monitoring and optimization

Maintenance

- Mobile network corrective maintenance works
- Mobile network preventive maintenance works
- Electricity support by portable diesel generators
- Back-up electricity "UPS" and bypass system installation, maintenance works
- Electrical installations and maintenance works
- HVAC systems installations and maintenance works

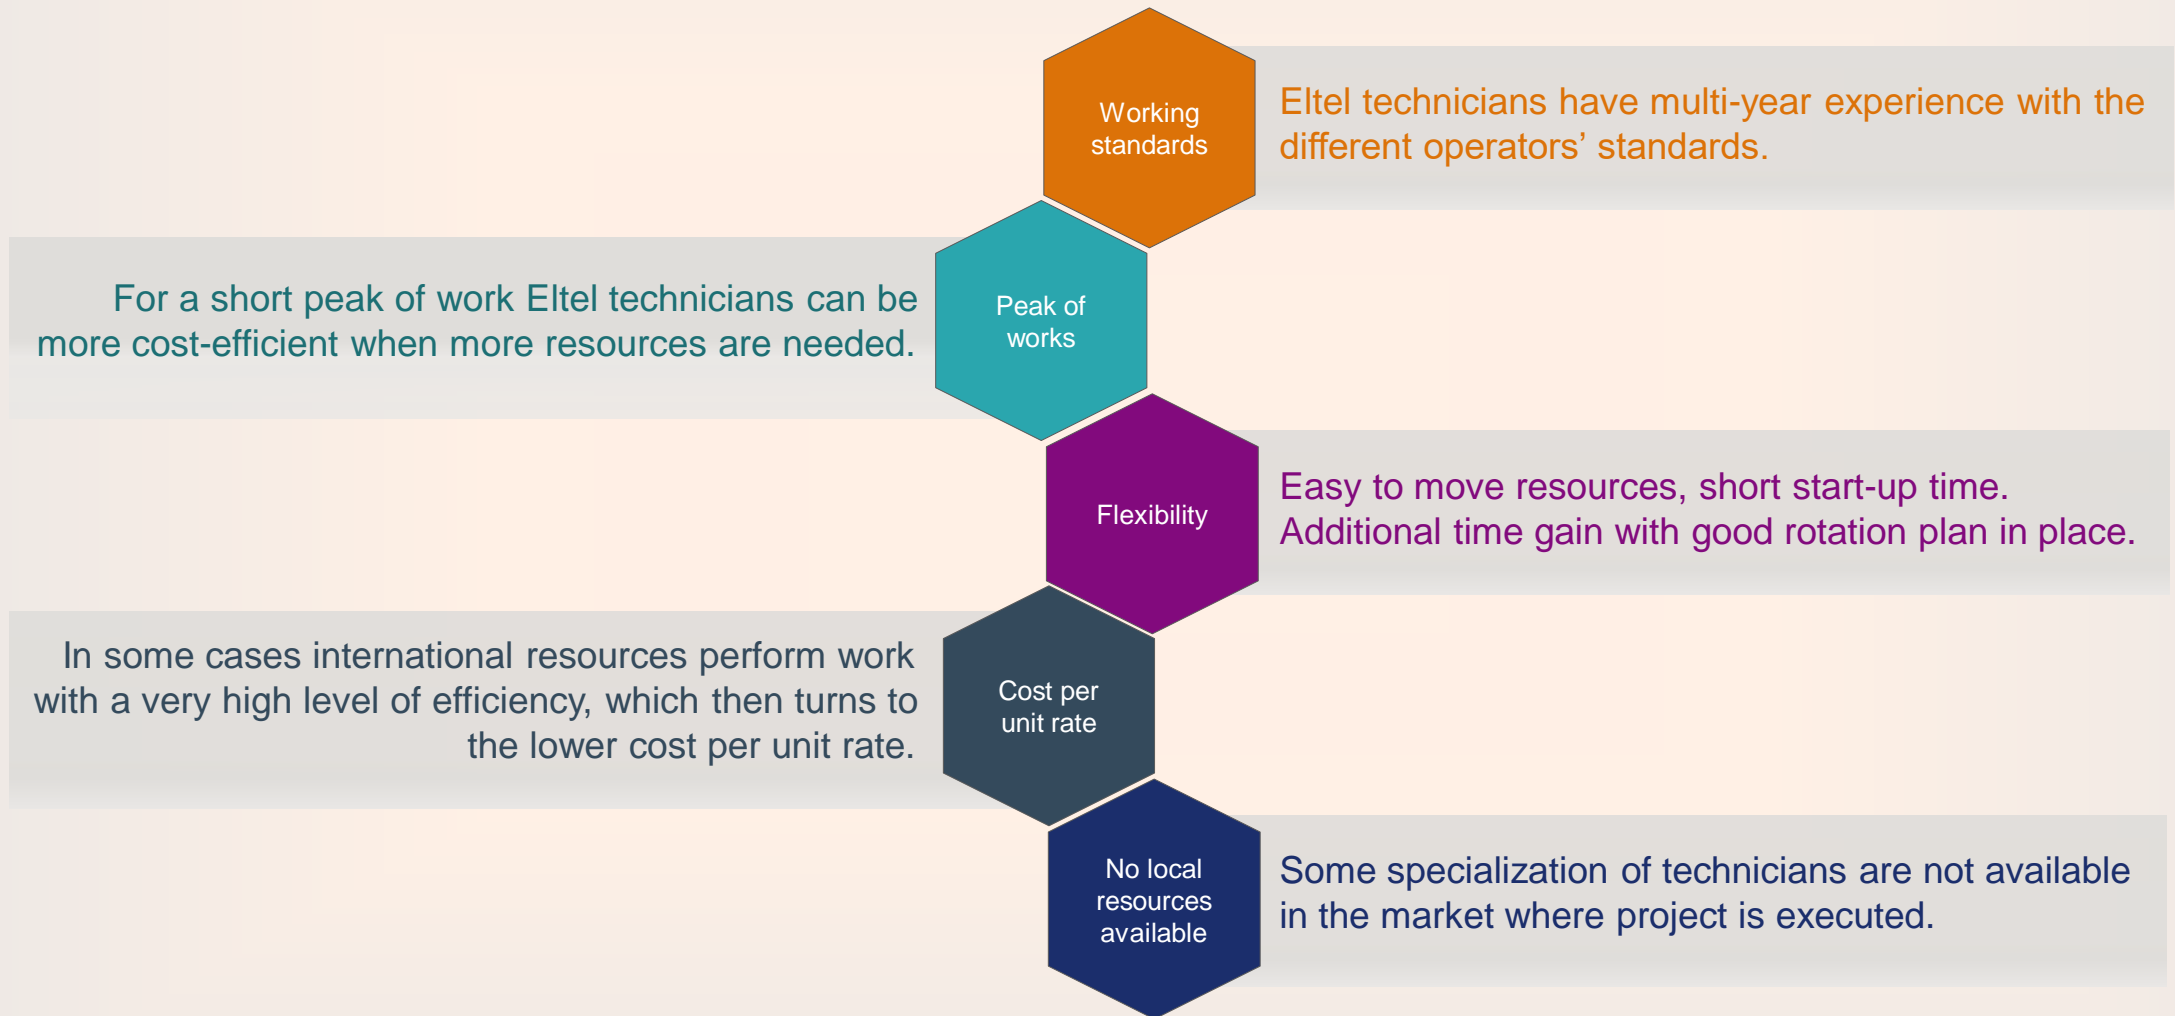

Fall protection solutions

- Design, supply and installation off [Turvatikas](#) fall protection solutions
- Annual inspection and maintenance works

Why Eltel?

Closer look: full service

OUR FLEET TECHNICIANS:

- Have required trainings
- Are in line with the work culture

WE TAKE CARE OF:

- Health insurance
- Travel expenses
- Accommodation
- Rotation

FULLY-EQUIPPED:

- Certified PPE
- Working & climbing equipment tools
- Machinery

Our four strategic priorities:

1. Always deliver on our customer promises
2. Optimize the use of competence and resources
3. Improve team performance
4. Work smarter and improve quality

Thank you!
